## Process to establish an eLearning Center

# Raabta eLearning

## Our Mission

To develop quality educational content and methods that will be freely available in Pakistan through a network of eLearning Centers

## Our Target

Establish in excess of 100 eLearning Centers in Pakistan within 5 years

## Our motivation

- Reduce disparity between the rich and the poor;
- Give teachers and students in deprived localities an equal opportunity to learn and grow;
- Develop standard contents and methods of learning;
- Develop collaboration between schools and content developers;
- Promote concept based learning.

## Our goals

- Grow our network of eLearning Centers;
- Continuously improve our methods and contents;
- Help more teachers and students.

## Our Policies and Principles

1. Equal opportunity for everyone without any discrimination;
2. Provide financial help to deserving schools:
  - a. By providing loans to acquire eLearning Center hardware and facilities such as laptops, monitors, tables, and chairs etc;
  - B. By providing monthly financial assistance to meet the operating expenses such as teacher's salary and internet connection charges;
3. Free training will be provided to the teachers;
4. All electronic or web-based elearning content will be provided free of cost
5. A copy of the printed content will be provided free of cost .

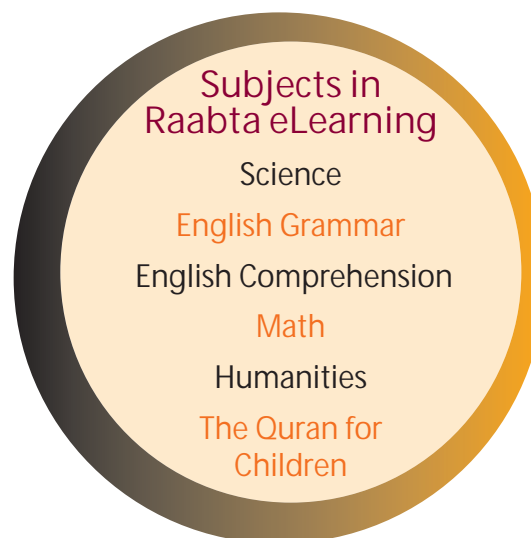

## What is "Raabta eLearning"?

It is a free educational website developed by IIm-o-Amal. It includes capabilities such as online course development, course delivery, student assessment, multimedia contents like audios, videos and graphics, and analytical reports for the class and the school.

eLearning supplements traditional methods of learning: it is more interactive, has rich audio and visual content, easily accessible from anywhere and anytime, promotes standard methods, and provides immediate assessment of students.

## What are the available subjects in Raabta eLearning?

It has courses for Science, English, Humanities, Math, and the Quran for primary classes (Grades 1 to 5). Courses for secondary classes and vocational training are being developed.

## What is an "eLearning Center"?

It is an educational facility supervised by a teacher. It comprises of an LCD monitor, several tablets, laptops, an Internet connection, white board, seating facility, reference books and printed material, and free access to our eLearning website. An eLearning Center may be established in a school, a madarasa, a community center, home-based tuition center, a library or any other place of learning.

## What is the method of learning in eLearning Center?

- eLearning is based on "story-telling" style loved by children;
- Each course is divided into modules, units and topics;
- Each topic consists of a number of slides
- Each slide has picture, text, audio visual content and further reading material;
- After the presentation of slides children are given printed handouts;
- At the end of the class children attempt multiple choice questions;
- The results are immediately available.

## Facilities in an eLearning Center

Seating Facility for students and teachers  
LCD monitor, whiteboard, Laptops, tablets, Internet Connection  
Free Access to Raabta eLearning Website and printed reference material
